Moral Hazard Questionnaire - Field Guide

When It Applies

The Moral Hazard Questionnaire (MHQ) is mandatory for proposals where the sum assured exceeds 25 times annual income, for applicants above age 55, or where medical evidence shows impairment.

Fields

The MHQ captures the Application Number, Name of Life Assured, nominee relationship to the proposer, and the place and date where the questionnaire was completed.

Assessment

Underwriting reviews occupation, avocation, income consistency and prior declines. Inconsistent nominee relationships or missing places/dates are the most common reasons an MHQ is returned for rework.
