Suitability Profiler Declaration - Notes

Purpose

The Suitability Profiler records whether the recommended product matches the customer's income stability, financial goals and risk appetite. It must be completed before the proposal is signed.

Who Completes It

The Agent or SP records the customer's responses; the customer signs the declaration. Fields include the Application Number, Name of Life Assured, and the Agent/SP code with the place and date of the discussion.

Red Flags

A recommendation is unsuitable if the premium exceeds 30% of stated annual income, if the customer's stated horizon is shorter than the Policy Term, or if liquidity needs conflict with surrender charges.
